

Our Workshop's Essential Questions:

- 1) How can I better promote two specific 21st Century Competencies (**Knowledge Construction & Use of Technology for Learning**) in my GATE classroom or when working with GATE students?
 - 2) How can using Google Slides with Screencast-O-Matic increase the **student-centeredness** of our GATE curriculum? How can these programs improve our **Project-Based Learning** philosophy?
 - 3) What tools for **self-regulation** would need to be developed to ensure quality student output?
-

Set your timer. You only have 35 minutes to complete this challenge.

Center #4: Video Killed the Traditional Quiz

Your video's topic: applying math to your actual lives

1. Quickly read the first half of "[Math Curse](#)." You can read the rest after lunch if you really want to know how it ends!
2. Work with a partner to create a Math Curse-inspired multiple choice quiz question about something that happens to nice people on Saturdays. Your quiz question should have four multiple choice options as potential answers: a, b, c, and d.
3. Using animation features, create a Google Slideshow that does the following in this order:
 - a. Introduce problem
 - b. Introduce answer option a
 - c. Introduce answer option b
 - d. Introduce answer option c
 - e. Introduce answer option d
 - f. Jeopardy theme music (or something to pass the time)
 - g. Revelation of the correct answer with an explanation of the answer.
4. Practice 3a - 3g several times before actually recording the presentation
5. Record using Screencast-O-Matic while you go through your Google slide animations. It's okay to mess up and have to start over, but your third try will have to be your "final take."

Bonus Challenges (if you have the time or a gifted and talented inclination)...

- Make an introductory slide that explains what a "Math Curse" is. Use animation to make numbers or math symbols float across the screen while you are explaining the concept.
- Create a box in Google Slides in the bottom right-hand corner, color it in brightly, then make certain it's perfectly sized to not only hold the webcam video but also surround your image with a lovely, bright color.
