

Bats

by Dante, fourth grade writer

The most important thing about bats is that they eat nasty pesky mosquitoes. Bats are nocturnal to keep them from furious slobbering danger. Bats use sonar to help them know where they are and so they don't collide into anything. Bats are as blind as a doorknob so it's difficult for them to know where they are. They are as black as outer space. But the most important thing about bats is that they eat nasty pesky mosquitoes.

A Recipe for Exploding Universe Cupcakes

by Wittekin, 6th grade writer

Ingredients:

- 1 cup sugar (stars)
- 2 cups baking soda (space dust)
- 1 cup pudding (dark matter)
- 6-10 marshmallows (galaxies)
- 1 1/2 cups white vinegar (empty space)
- 2 cups water (gravity)

Instructions:

Mix 1/2 cup of stars with space dust, 1/2 cup of dark matter, and the galaxies. Add 1 cup of your gravity and mix thoroughly. Put in oven for thirty minutes on high heat. While it's cooking, mix the other cup of gravity with empty space, remaining stars and remaining cup of drak matter. Stir well. Drizzle this mixture on the baked universe. Back away about ten feet and watch the explosion.

History of Argentina

In no country is the influence of history and geography more clearly than Argentina. It is especially interesting, therefore, in reviewing Argentine history, to watch for the gradual develop of economic, psychological, and racial characteristics which differentiate this country from other American republics.
